Given a sample of the 8mg dose. flow improved dramatically after about 30 mins. effect lasts 2-3 days. there does seem to be a meaningful reduction in ejaculate. overall orgasm experience is somewhat less as a result. so, some tradeoff. in my case flow had become so poor it is one worth making. imodium is expensive, so trying tamsulosin as an alternative now. 55 year old male with no other meaningful health issues.
