I started taking lowest dose at 1.5 with a few side effects, headache, blemishes on my skin which became quite irritable and itchy. my blood pressure started at 220/140 dropping to 153/98 so doctors increased dose to 2.5 and now blood pressure between 143/98 134/88. i will speak to doctors again as i am suffering with tiredness and bouts of high blood pressure noticeable with my face burning and cheeks flushing. i must be the unlucky one that has picked up side effects.
