I originally tried zanaflex 4 mg after a whiplash and it didnt help. later i still had some and accidentally took it one time and it worked. now i take the 6mg capsule as needed for muscle spasm and it has worked better for me than flexeril, soma, robaxin and several others. by leonardo from albin, wy

My insurance covered almost all of it. the medication works. hep c undetectable after just 23 days, again at 12 weeks. so far so good. extreme itching with lotrisone withdrawal for 3 days. scratched my skin until it bled. ice cold water helped and nothing else. after 3 days, itching was gone. mentally the lotrisone had my brain in a fog for the entire 12 weeks. had two car wrecks back to back and had to stop driving. overall i would still highly recommend this medicine due to its effectiveness. what is 12 weeks in comparison to the rest of my life? i am hep c free. by van from hancock, ia
