Given a sample of the 8mg dose. flow improved dramatically after about 30 mins. effect lasts 2-3 days. there does seem to be a meaningful reduction in ejaculate. overall orgasm experience is somewhat less as a result. so, some tradeoff. in my case flow had become so poor it is one worth making. evista is expensive, so trying tamsulosin as an alternative now. 55 year old male with no other meaningful health issues.

Evista on sale cheap online, order evista eu

I have been on evista for about a month and i must say there is a improvement in my pain level. the only side effect at first was nausea and then that went away after the first couple of weeks because the body needed to get used to it but after you are over that hump the only side effects for me was hot flashes and sweats. however, to be out of pain is all that i care about. i was out of work for a year and a half and now i'm able to function and work again. i thank god for evista and my doctor who suggested it. she has never steered me wrong. to anyone who has fibromyalgia please try this medicine and give it a little while to work. stick out the side effects the first couple of weeks and the pay off is wonderful.
