I have been on symbicort for over 8 years and have actually gained weight. i have a very healthy lifestyle (exercise for one hour 5 days a week, and eat healthy), but nothing has been working. my endocrinologist consistently increases my prescription and nothing changes. next time i see her i am going to get on armour.

My insurance covered almost all of it. the medication works. hep c undetectable after just 23 days, again at 12 weeks. so far so good. extreme itching with symbicort withdrawal for 3 days. scratched my skin until it bled. ice cold water helped and nothing else. after 3 days, itching was gone. mentally the symbicort had my brain in a fog for the entire 12 weeks. had two car wrecks back to back and had to stop driving. overall i would still highly recommend this medicine due to its effectiveness. what is 12 weeks in comparison to the rest of my life? i am hep c free. by van from hancock, ia
