I've been taking lopid for almost a year now and have had great results. my triglycerides have dropped dramatically and my over all health has improved. i would have given this a 10 rating but i do have one problem with this medication. it can be difficult to remember to take lopid 30 minutes before meals. a small adjustment as far as im concerned, though. by cristobal from banner, ms

How is ampicillin used to check for success of transformation

I was given a 10 day prescription after sinus surgery. the pros are 1) i only have to swallow one pill per day 2) it doesn't bother my stomach (other antibiotics have in the past) and 3) i've not gotten a yeast infection. the con is that it seems to totally dry me out. i take it in the evening, and my mouth/nose/lips are incredibly dry regardless of the amount of water i drink all night long. it is uncomfortable enough to keep me awake. i also experience dryness during the day, but not the same severity.

I take ampicillin for severe back pain and before that i was taking oxycontin which when i ran low due to insurance making you wait too the very last day, where i come from. i would start feeling sick like i had the flu, but with ampicillin that does not happen. by howard from vera, ...
