Atarax toddler

I was opiate dependent for almost 6 years. six years of my life that i hardly remember because i was in a cloud of oxycontin and other heroin like prescription drugs. about 6 months ago i was introduced to the atarax program and ever since that day ive had my life back. i used to steal, lie and do whatever it took to get a fix. i lost my family, friendships, jobs, cars, everything. now over the last six months ive turned into a different person, the person i was before taking drugs. i would recommend atarax for anyone who is dependent on pain killers. i would also however, recommend seeking counseling along with it to prevent any relapsing. by leonel from vinson, ok

Reliable place to buy atarax

I tried atarax with the starter pack. i experienced terrible nausea, insomnia, hot flashes, racing heart and fever. my doctor reduced the dosage back to 12.5 mg but with very little improvement of side effects. she finally told me to stop taking it. i have had great results with my other medications and i wasn't having any issues but my doctor wanted me to try this new "great" medication. i haven't felt this bad in years. if i were having problems i could understand her trying the atarax with me but for me this medicaiton made me feel worse than i have in a very long time. i am relieved to be off of it. in the future if my other medications become less effective i might give it another shot.. but for now "no thanks".
