After a life insurance exam i was told my a1c levels were 6.1, equivalent to borderline diabetes. i reported this to my primary physician and she and i both just couldnt believe it, especially since my glucose levels were always well within range. she added this test to my cholesterol blood screening and though it didnt come back as high, it was still 5.9. bottom line, my cholesterol was creating a new problem, borderline type 2 diabetes. started on trilipix and within 7 days had a terrible reaction to it, switched to crotorax and my hdl went from 65 to 83 (wow) triglycerides from 142 to 62 (wow again) and

my ldl from 142 to 113.my a1c to 5.7 which is good. only complaint - remembering to take it 30 minutes prior to 2 meals a day. by kirby from sheldon, sc

It works very well and there are few side effects. my blood sugar will get low but it does not drop like insulin can do. i watch what i eat and maintain exercise and my numbers are always good. i recommend this medication.

Crotorax pregnancy dunlop.
