Etidronate online overnight

I tried etidronate with the starter pack. i experienced terrible nausea, insomnia, hot flashes, racing heart and fever. my doctor reduced the dosage back to 12.5 mg but with very little improvement of side effects. she finally told me to stop taking it. i have had great results with my other medications and i wasn't having any issues but my doctor wanted me to try this new "great" medication. i haven't felt this bad in years. if i were having problems i could understand her trying the etidronate with me but for me this medicaiton made me feel worse than i have in a very long time. i am relieved to be off

of it. in the future if my other medications become less effective i might give it another shot.. but for now
"no thanks";

Etidronates overnighted cod

My doctor put me on etidronate to help my sinusitis and also a tummy issue i've been having. so far so good. i feel better already with increased energy but i'm not sleeping. i have dry mouth but solved that by keeping a bottle of water by the bed. just took a sip every time i woke up (which was like every 1/2 hour).
