Order xopenex,

I tried the shot twice once on august 2010 and recently started again in may. first time was bad i had really bad anxiety and moodiness, which at first i thought it was hormones from having the baby. i couldnt lose weight even though i was exercising everyday. after the 3 months the first time no more moodiness like before when i was on it. i had also lose weight and things were back to normal. i wanted to try again because i only did it once but again it has been a bad experience. by hollis from lawrence, ks
