Aldactone side effects weight gain

I have read many bad reviews on this treatment, so let me tell you my positive one. i am early 60s, very active, slightly built and failed my bone density scan. did my research (very important) and found a fabulous young female rheumatologist. after viewing all of my prior dexa scans we tried one fosamax (i had been on evista for four years prior due to healed multiple ulcers). the fosamax reaction was very bad but the gastric distress eased up finally. we decided on the aldactone infusion. the injection was pleasant, the people great. i went to work. had a headache for three days, took medicines for the headache but carried on my regular business. this was one week ago. i feel great.
