I tried the shot twice once on august 2010 and recently started again in may. first time was bad i had really bad anxiety and moodiness, which at first i thought it was hormones from having the baby. i couldnt lose weight even though i was exercising everyday. after the 3 months the first time no more moodiness like before when i was on it. i had also lose weight and things were back to normal. i wanted

to try again because i only did it once but again it has been a bad experience. by hollis from lawrence, ks

I was born with a thyroid condition. i am 23 year old female. i did the other brand for a while, and made me tired, sad, and just made me feel hopeless. i am on prograf 88mcg and although i sometimes feel sad, my weight is maintained, i'm able to work, and play with my 1 year old daughter, who thank god is healthy. finding the right dosage is so important and is a trial and error. if everything is good and you only have one symptom like sadness...get a hobby, again a close friend is so important and always take your pill!
