I am 19 years old. i have been on the depo since i was 16. i got on it after my 6 week check up. when i first started on the depo shot i was a very mean person. i have never in my life been like that. i am a very nice laid back person. i gained 40lbs withing the first 3 months. i am not a big eater and i do eat healthy for the most part. i also had pregnancy like symptoms, headaches and bloating. after a year of being on the depo my mood had changed and i became back to myself and my body got used to it. i really really love the depo shot but i am thinking of switching to another method. i love how i havent had a period in 3 years and it is 100% effective but i cannot deal with it making my weight go up and down. overall minus few things i love it. by santos from wapanucka, ok

Dicyclomine bladder infections elderly.

Buy online dicyclomine

I just started the gel, which i choose because it does not cause high blood pressure and i did not want to take any more pills. so far so good. if you follow the directions, and rub the gel in until your skin is dry, there is no sticky residue. i then just put regular cream over the sight. im currently having some stomach cramping but im not sure if it is because of the medicine. by mitchell from springfield, la
