Ive been taking benzac now for about 4 years, i havent had any side effects that i can tell but after reading others experience of memory loss, that could be one that i do have. i take the maximum dose that is prescribed now and i cant say enough about this medication. i was so totally lost, severe depression, suicidal, lowest of lows, it was so bad, i couldnt get my ducks in a row (my mothers comments to me, daily). now, im feeling in control of my life, im back with my spouse and caring for my mother, whos ducks have scattered about, and im living happily. by quinton from ringling, mt

Should very careful if suffering from osteonecrosis of jaw, and avoid in pregnancy.

Benzac and ibuprophen.

I've been taking levaquin for a sinus infection. i am on only my second dose, but yesterday after taking my first dose i felt immediate results. much less nasal discharge than in the days and even hours prior. i had no problems with sleep, in fact that night was the first time i slept through the entire night in weeks, without even waking up to go to the bathroom.
