I find compazine very effective and comforting as use as a pain reliever. i have been on morphine, percocet, vicoden etc, infact i grew an opiate addiction. i did not intend to shed my narcotics for a drug that is supposed to "not carry a high/ or euphoric effect" i was wanting to keep that feeling, yet still i was never really pain free. i could not function on a daily basis with the amount of pain i was in. my dr. recently switched me to compazine, and i am so relieved. it is very effective. by rey from topping, va

Ive been taking compazine now for about 4 years, i havent had any side effects that i can tell but after reading others experience of memory loss, that could be one that i do have. i take the maximum dose that is prescribed now and i cant say enough about this medication. i was so totally lost, severe depression, suicidal, lowest of lows, it was so bad, i couldnt get my ducks in a row (my mothers comments to me, daily). now, im feeling in control of my life, im back with my spouse and caring for my mother, whos ducks have scattered about, and im living happily. by quinton from ringling, mt
